GUARDIAN OF EXCELLENCE AWARD®

This award honors organizations that have reached the 95th percentile for patient experience, engagement or clinical quality performance. Guardian of Excellence Awards are awarded annually to organizations that sustain performance in the top 5% for each reporting period for the award year.

PATIENT EXPERIENCE

The Guardian of Excellence Award is given to organizations that have achieved the 95th percentile or higher for any of a set of designated survey measures, including Likelihood to Recommend, Overall Rating and Teamwork. For organizations that use an integrated Press Ganey patient experience survey or CAHPS-only survey, the award program also considers performance on the CAHPS Rate 0-10 measure.

The 2022 awards evaluate performance on surveys received by March 31, 2022, in the following areas:

- Scores (Mean Score for Press Ganey and Top Box for CAHPS) are based on the standard lookback period for the population.
- Lookback periods vary depending on the population
- At least one of the award measures must have a rank at or above the 95th percentile for every lookback period.

Peer groups are determined based on the information in the demographic profile. To be eligible, organizations must:

- Fit the eligibility requirements of one of the targeted award peer groups
- Meet minimum n guidelines* based upon the targeted peer group
- Actively surveying for the entire award period
- eSurvey adjustments and phone calibrations are applied to all data where appropriate.
Patient Experience winners will be identified in the following categories:

</tbody>
</table>
*Must have been a Press Ganey client for the entire year with data received in each month during the award period. In addition, total annual returned n size must meet at least 90% or exceed the summed quarterly requirements for the peer group minimum n guidelines.

**For the Medical Practice category, the entire practice must meet the criteria in the National Facilities database, or at least 75% of the organization’s sites must meet the criteria in the National Sites database. Awards are not offered for individual sites.

***CAHPS analysis uses phone-adjusted scores, not eSurvey adjustment.

Note: As organizations transition to Press Ganey Targeted Surveys, the awards transitioned from using the composite overall rating to item-level measures to allow for accurate benchmarking. Press Ganey will consider performance on each of the award measures; if performance on any of the measures meets the criteria, the organization will be a winner.
WORKFORCE ENGAGEMENT

Guardian of Excellence awards honor facilities for their performance in employee engagement or physician engagement. Engagement performance scores from peer groups are used to determine winners. Peer groups are determined by facility attribute information provided in the demographic profile or by work unit information provided in the reporting hierarchy. Regardless of the peer group level (facility or unit), awards are assigned at the facility level. Facilities must meet all benchmark inclusion criteria to be eligible for these awards.

EMPLOYEE ENGAGEMENT

Honors facilities who achieved the 95th percentile or higher on Engagement for their most recent census survey completed during the award year (January – December 2021).

PHYSICIAN ENGAGEMENT

Honors facilities who achieved the 95th percentile or higher on Engagement for their most recent census survey completed during the award year (January – December 2021).

CLINICAL QUALITY

Using 2021 calendar year data, 12 active and representative clinical measures from the emergency department, outpatient services, pregnancy and related conditions, stroke, tobacco, and venous thromboembolism measure sets will be used to calculate an overall composite score for each organization.

Organizations performing in the 95th percentile on the overall composite score will be recognized.

To be eligible for this award, organizations must have a minimum of 10 cases for at least five measures in 2021.
PINNACLE OF EXCELLENCE AWARD®

The Pinnacle of Excellence award is given annually to the top performing organizations on the basis of extraordinary achievement. This award recognizes organizations that have maintained consistent levels of excellence for multiple years, with the highest performing organizations winning in each category. For all Pinnacle of Excellence Awards, organizations are eligible for winning category awards based on information in the demographic profile; to be eligible the demographic profile must be completed in the Press Ganey database.

PATIENT EXPERIENCE

This award recognizes the top performers in each category based on the performance on designated award survey measures for the three-year award period. Winners are identified based on performance on three full years of data, from April 2019 - March 2022. Up to four winners will be identified in each category.

The award considers performance on global survey measures including Likelihood to Recommend, Overall Rating and Teamwork, using an average across the designated questions on the Press Ganey survey.

For organizations that use an integrated Press Ganey patient experience survey or CAHPS-only survey, the award program also considers performance on the CAHPS Rate 0-10 measure.

To be eligible, organizations must meet minimum n guidelines for all three years of the award period, as noted below. For Press Ganey surveys, annual n size is pulled from the overall composite; for CAHPS surveys, the n size is based on the CAHPS Rate 0-10 question.

WORKFORCE ENGAGEMENT

Engagement awards honor organizations for performance in employee engagement and physician engagement. Winners are awarded at the system level; scores from individual hospitals, facilities, sites or work groups are considered as part of the overall system score.

EMPLOYEE ENGAGEMENT

This award recognizes top performers in the Nat’l Healthcare Avg benchmark based on their averaged Engagement score from census surveys conducted in the two most recent calendar years. If a client conducted more than one census survey annually, Engagement scores from the most recent survey in that year will be used.

The three facilities with the highest overall scores in each of the following market segments will be recognized:

- <100 returned employee surveys
- 100-499
- >500

PHYSICIAN ENGAGEMENT

This award recognizes top performers in the Nat’l Physician Avg benchmark based on their averaged Engagement score from census surveys conducted in the two most recent calendar years. If a client conducted more than one census survey annually, Engagement scores from the most recent survey in that year will be used.

The three facilities with the highest overall scores in each of the following market segments will be recognized:

- <25 returned physician surveys
- 26 to 75
- >75
CLINICAL QUALITY

This award recognizes a consistent top performer from each organization size category using two years of data from 2020 to 2021.

There are 12 active and representative clinical measures from the emergency department, outpatient services, pregnancy and related conditions, stroke, tobacco, and venous thromboembolism measure sets used to calculate eight quarterly composite scores for each client.

The inclusion of measures for evaluation requires adoption by enough organizations to ensure a valid sample for judging relative performance.

To be eligible for this award, organizations must have a minimum of 10 cases for at least five measures in 2021.

Overall performance is calculated using a methodology that incorporates both performance across all measures and consistency over time.

- Average facility-level performance score is determined for each measure and reporting period.
- These scores are adjusted by the variation across reporting periods by subtracting $0.2 \times \text{Standard Error}$.
- The average of these adjusted measure scores is calculated to produce an overall performance score for each facility.
- The client with the highest overall performance score in each of three bed size segments will be awarded: <100 beds, 100-299 and 300.

Note: The award program includes clinical quality measures that are proportional measures with sufficient participants and without the need for risk adjustment.

Measures for all clinical quality awards include:

NDNQI® AWARD FOR OUTSTANDING NURSING QUALITY

The NDNQI Award for Outstanding Nursing Quality is awarded annually to the best performing hospital in each of six categories: academic medical center, community hospital, pediatric hospital, rehabilitation hospital, psychiatric hospital, and international. Participation in the RN Survey is not required, however, measures on the RN survey are available for inclusion based on the total set submitted. A total of 17 measures are included in overall quality assessment:

• Academic medical centers and teaching hospitals must have submitted data on at least 11 measures, including 5 or more patient outcome measures.
• Community, pediatric, and rehabilitation hospitals must have submitted data on at least 9 measures, including at least 3 patient outcome measures.
• Psychiatric hospitals must have submitted data on at least 6 measures, including injury assault rate.

Hospital scores are calculated in a two-step process.

1. Consistent with the unit focus of NDNQI, hospitals are compared based on assessments of their nursing units. Each unit is assessed only in comparison to other units of the same type to provide control for differences among unit types in patient risk and acuity. For each measure, standardization by unit type is accomplished by expressing each unit’s score in terms of the number of standard deviations the unit fell above or below the mean score for all other units of the same type.

2. These standardized scores are averaged across units in each hospital to yield a hospital score on each measure, and each hospital’s scores on the relevant measures are averaged to produce an overall score. Hospitals are ranked according to these overall scores. The highest-ranking hospital in each category is identified and, after undergoing a qualitative screening, given the award.

Please note that international clients are excluded from the “Overall NDNQI Award” due to underlying data differences in comparison to U.S. clients.
